MICHAEL CHABASINSKI

SECURITY OPERATIONS MANAGER | PHYSICAL SECURITY & ALARM MONITORING, EMEA

mintus93@hotmail.com | 083 148 5088 | Dublin, Ireland

PROFILE

Security operations professional with over 12 years' experience managing physical security and alarm monitoring across EMEA sites in high-profile corporate environments. Direct, hands-on experience administering C•CURE 9000 and Victor CCTV/VMS platforms — the same systems specified for this role — with day-to-day responsibility for access control, incident response, and vendor-managed security operations. Skilled in compliance auditing, penetration-testing support, and data-driven security reporting (KPI, BIRS, trend analysis), backed by genuine technical and reporting capability including in-house Power BI dashboard development for security operations data.

KEY SKILLS

- Physical security operations & campus-level guard-force leadership
- EMEA alarm monitoring & incident escalation across multiple regional sites
- Access control administration and troubleshooting: C•CURE 9000 (iSTAR), Victor, Genetec, NVR/CCTV
- Incident response, escalation & crisis coordination
- Vendor management & technical issue resolution (Johnson Controls, Evolution Security, QCIC)
- Compliance auditing, GDPR data handling, penetration-testing support
- Security reporting & data analysis (KPI, BIRS, trend reviews, Power BI dashboards)
- Training needs analysis (TNA), team development & induction/refresher training
- Cross-regional & EMEA stakeholder communication
- System & user administration: Timegate, BMS Portal, Gallinet, HR Recruit

TECHNICAL SYSTEMS EXPERIENCE

- **First-line fault triage:** Electronic security faults are reported to me by the officers on site. I assess each one and decide whether it can be fixed on site or must be escalated to the vendor engineer (Johnson Controls) or the internal technical/CIO team, with evidence and logs attached.
- **Access control hardware:** First-entry investigation of iSTAR controllers, readers, locks, request-to-exit (RTE) devices, break glass units (BGU), DSMs and workstations; controller downloads, iSTAR reboots and controlled power-downs; reader power cycles; assisted with iSTAR installation and programming.
- **C•CURE 9000 administration:** Manage user permissions for administrator and monitoring operators; assist with configuration and troubleshooting, including anti-passback (APB) set-up, reader firmware upgrades and iSTAR firmware upgrades.
- **CCTV and NVR:** Assess NVR recording status and online cameras; add cameras to the NVR; configure camera retention periods; upload certificates; PoE reboots for cameras; NVR shutdowns and power-downs.
- **Network coordination:** Work with the networking team on switch port management for security equipment: supply MAC addresses and request port openings for equipment replacements and changes. Gather the network details a device needs (IP address, subnet mask, gateway, VLAN, DNS/NTP).
- **Basic network troubleshooting:** Command-line diagnostics (ping, ipconfig, tracert, nslookup, arp) to test cameras, controllers and workstations; IP configuration checks (IPv4 and IPv6); certificate installation for secure Ethernet connection.
- **Genetec:** Assist the wider team with Genetec rollout, mainly user devices, including setting up connections and installing certificates for thick-client use.

PROFESSIONAL EXPERIENCE

Security Manager — CIS Security Ltd *June 2023 – Present*

Client-based at Accenture | EMEA server, primarily UK & Ireland locations

- Lead day-to-day and strategic security operations across an EMEA server, with direct oversight of a contract guard force in a high-profile corporate environment.
- Administer access control and CCTV systems (C•CURE 9000 and Victor client): fault triage and first-line investigation, user permission management, support for installations and firmware upgrades, and ensuring continuous compliant operation.
- Act as first-line escalation point for security incidents and emergencies, coordinating on-the-ground response in line with SOPs and client protocols.

- Produce monthly reports, performance dashboards, and BIRS submissions from incident, system, and access-log data to support operational planning and audit readiness.
- Conduct internal audits and system checks for policy and regulatory compliance; support accreditation preparation through penetration testing and site reviews.
- Coordinate with security technology vendors (Johnson Controls, Evolution Security, QCIC) to troubleshoot faults, plan system upgrades, and implement new infrastructure.
- Conduct training needs analysis (TNA) and maintain a live training matrix to support team development and upskilling.
- Manage cross-regional collaboration between Ireland and broader EMEA/UK security leadership, including planning and chairing cross-regional meetings.
- Maintain operational systems (Timegate, BMS Portal) for accurate scheduling, reporting, and invoice/vendor approvals; track team performance, welfare, and attendance.

Operational Lead — Synergy Security *July 2021 – June 2023*

Client-based at Accenture, Dublin

- Oversaw security personnel, ensuring adherence to protocols and consistent performance standards.
- Coordinated with external vendors on maintenance and upgrades of security systems.
- Managed scheduling, shift planning, and day-to-day operational coordination.
- Provided mentorship and training to new team members.

Team Leader — Synergy Security *May 2018 – July 2018*

Client-based at Google, Dublin

- Led a team of security officers, coordinating daily tasks and responsibilities on a major technology campus.
- Acted as primary liaison between management and security staff.
- Worked directly with vendors to resolve access control and surveillance system issues.

Security Team Leader — Securitas Security *February 2012 – May 2018*

Client-based at IKEA, Dublin

- Oversaw security operations across assigned shifts and led a team of security officers.
- Managed loss-prevention strategy and stock-management processes.
- Coordinated with vendors on installation and maintenance of access control and surveillance systems.
- Worked closely with client management to maintain a safe environment for staff and customers.

EDUCATION & CERTIFICATIONS

- Bookkeeping Advanced, QQI Level 6 — Cork College of FET
- Train the Trainer, QQI Level 6 — Open College, 2025
- Training Needs Identification & Design, QQI Level 6 — Open College, 2025
- IOSH (Institute of Occupational Safety and Health) — 2024
- Irish Red Cross, Pre-Hospital Emergency Care Council Course — 2024
- Security Supervisory Management, QQI Level 6 — 2017
